

LISTING OF THE CLAIMS

Claims 1-8 (Canceled)

Claim 9 (Original): A member mounting apparatus comprising:

- an image forming lens unit;
- a holding member for holding said image forming lens unit;
- a solid state image input unit for photoelectric converting image focused by said image forming lens unit;
- a light source;
- an image for positioning adjustment illuminated by said light source for generating image to perform positioning adjustment of said solid state image input unit; and
- a fixing operation portion for performing positioning adjustment of image forming lens unit and solid state image input unit and for fixing said holding member and said solid state image input unit;

said image for positioning adjustment being focused on said solid state image input unit through image forming lens unit;

relative position of said image forming lens unit and said solid state image input unit being calculated based on photoelectric-converted focused data.
